

PHYSIOGNOMY

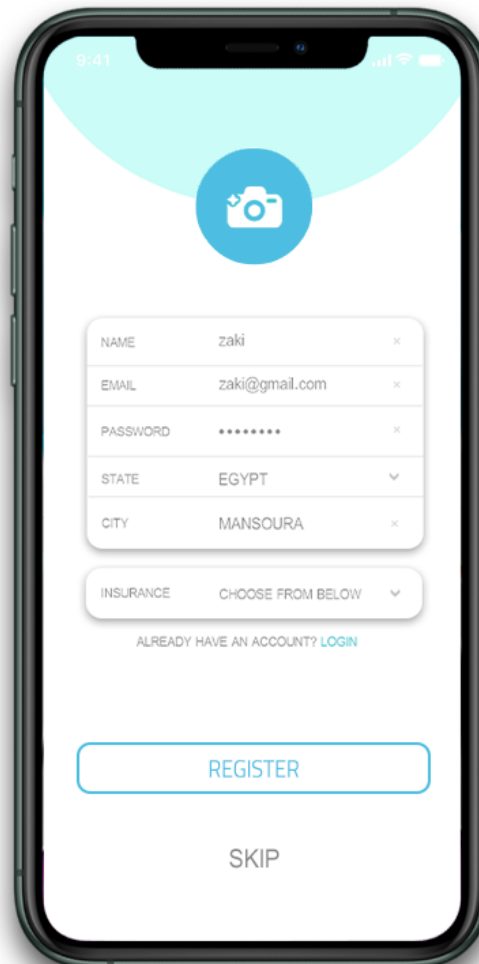

Finding New Ways to Tackle Life's Problems

Do you imagine that you suffer from a psychological disease?
May be but you can't tell how someone feels
just by looking at them so, this will be our turn.

Login & Register

Users are guided to login or register to the app and granted with full access afterwards

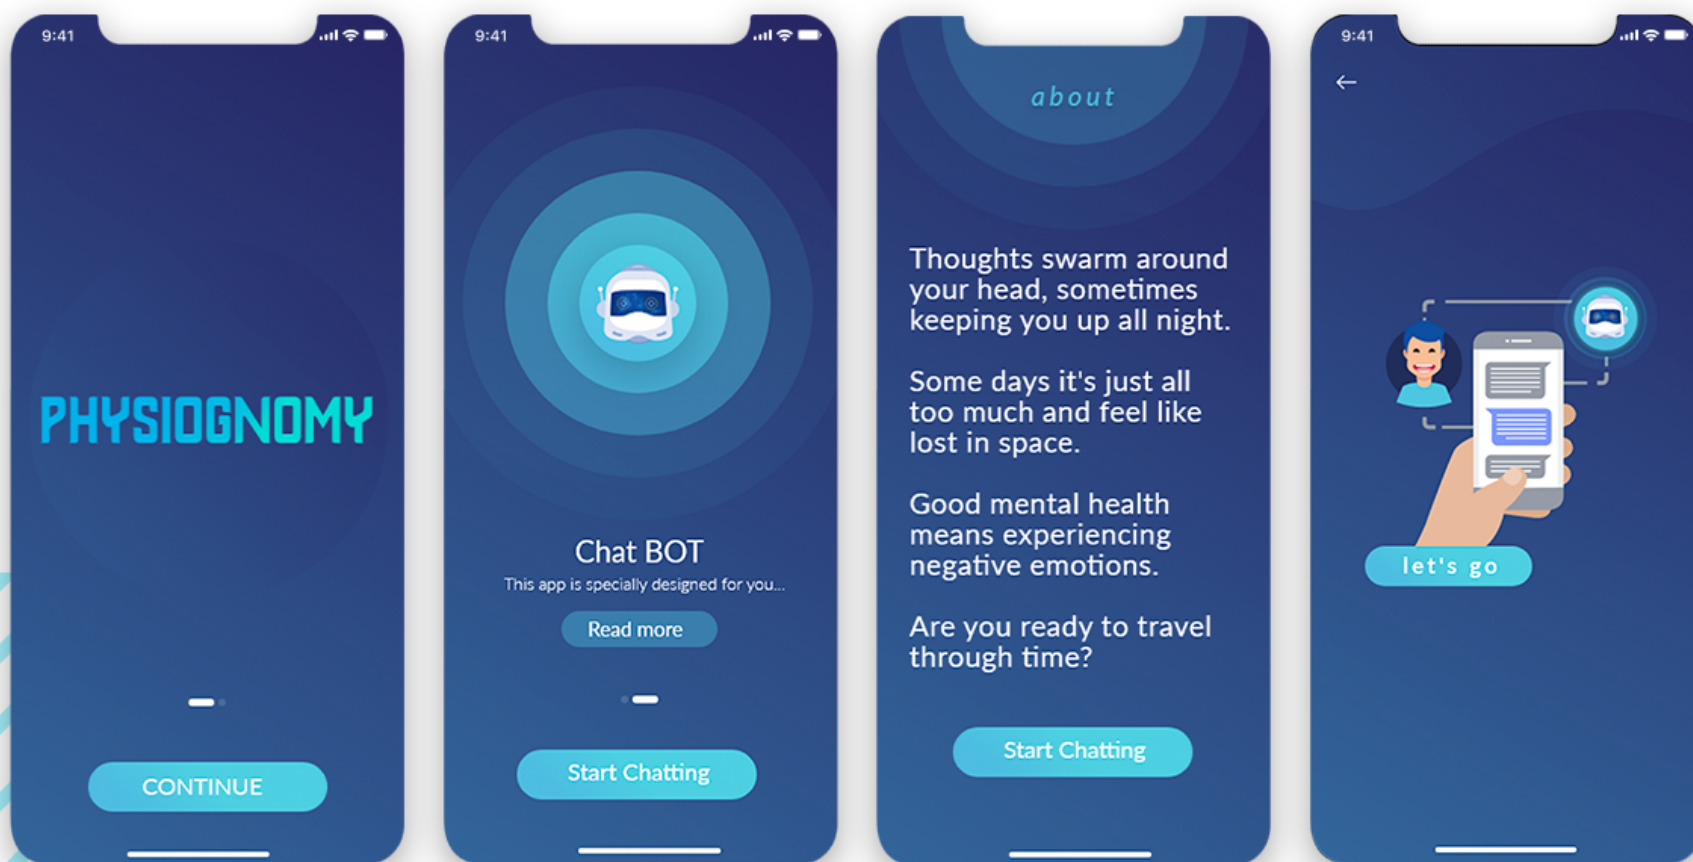

Main Screen

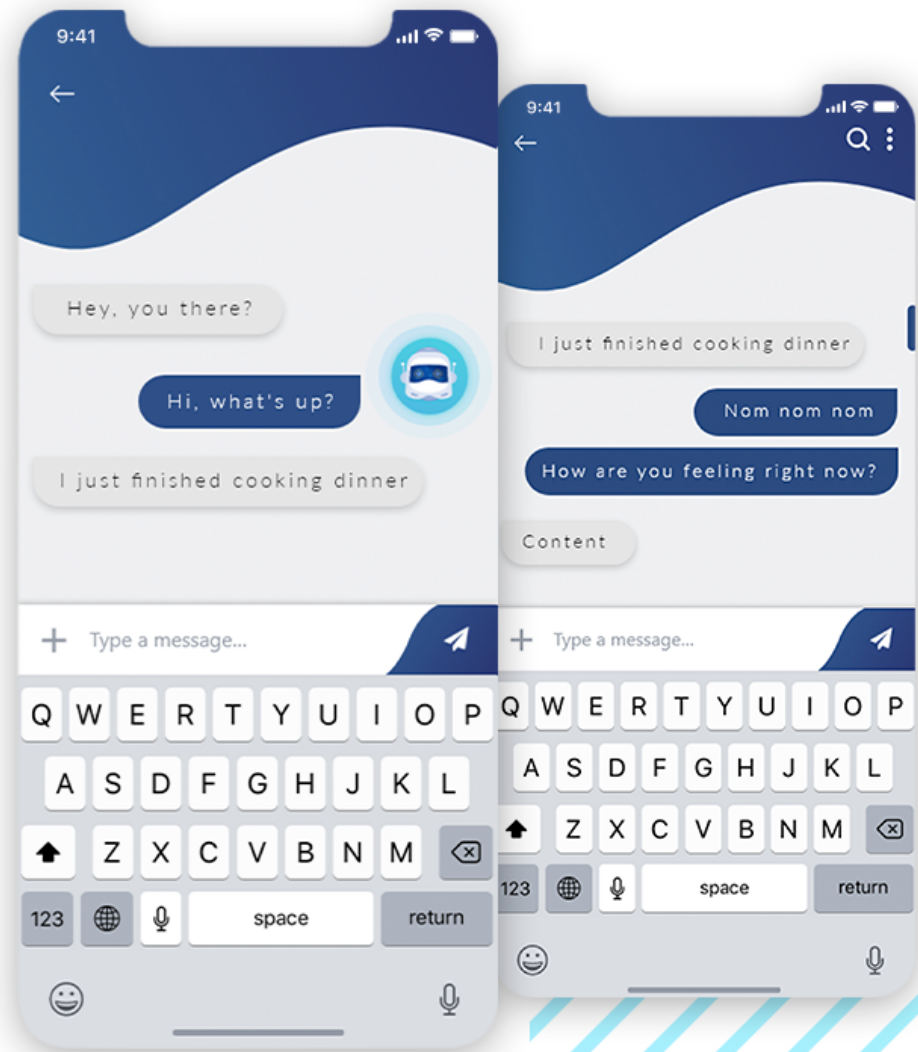

The disease will be diagnosed more accurately through chatting bot, depending on the game level selection.

To Take a break from everything and do something you enjoy

chatbot

The chat bot will begin conducting a personality analysis by talking to the user and asking them questions and displaying pictures with psychological meaning.

Just like physical health, we all have mental health it's our feelings, our thinking, our emotions and our moods.

Feeling down, angry, stressed is a normal part of life you have to face it.

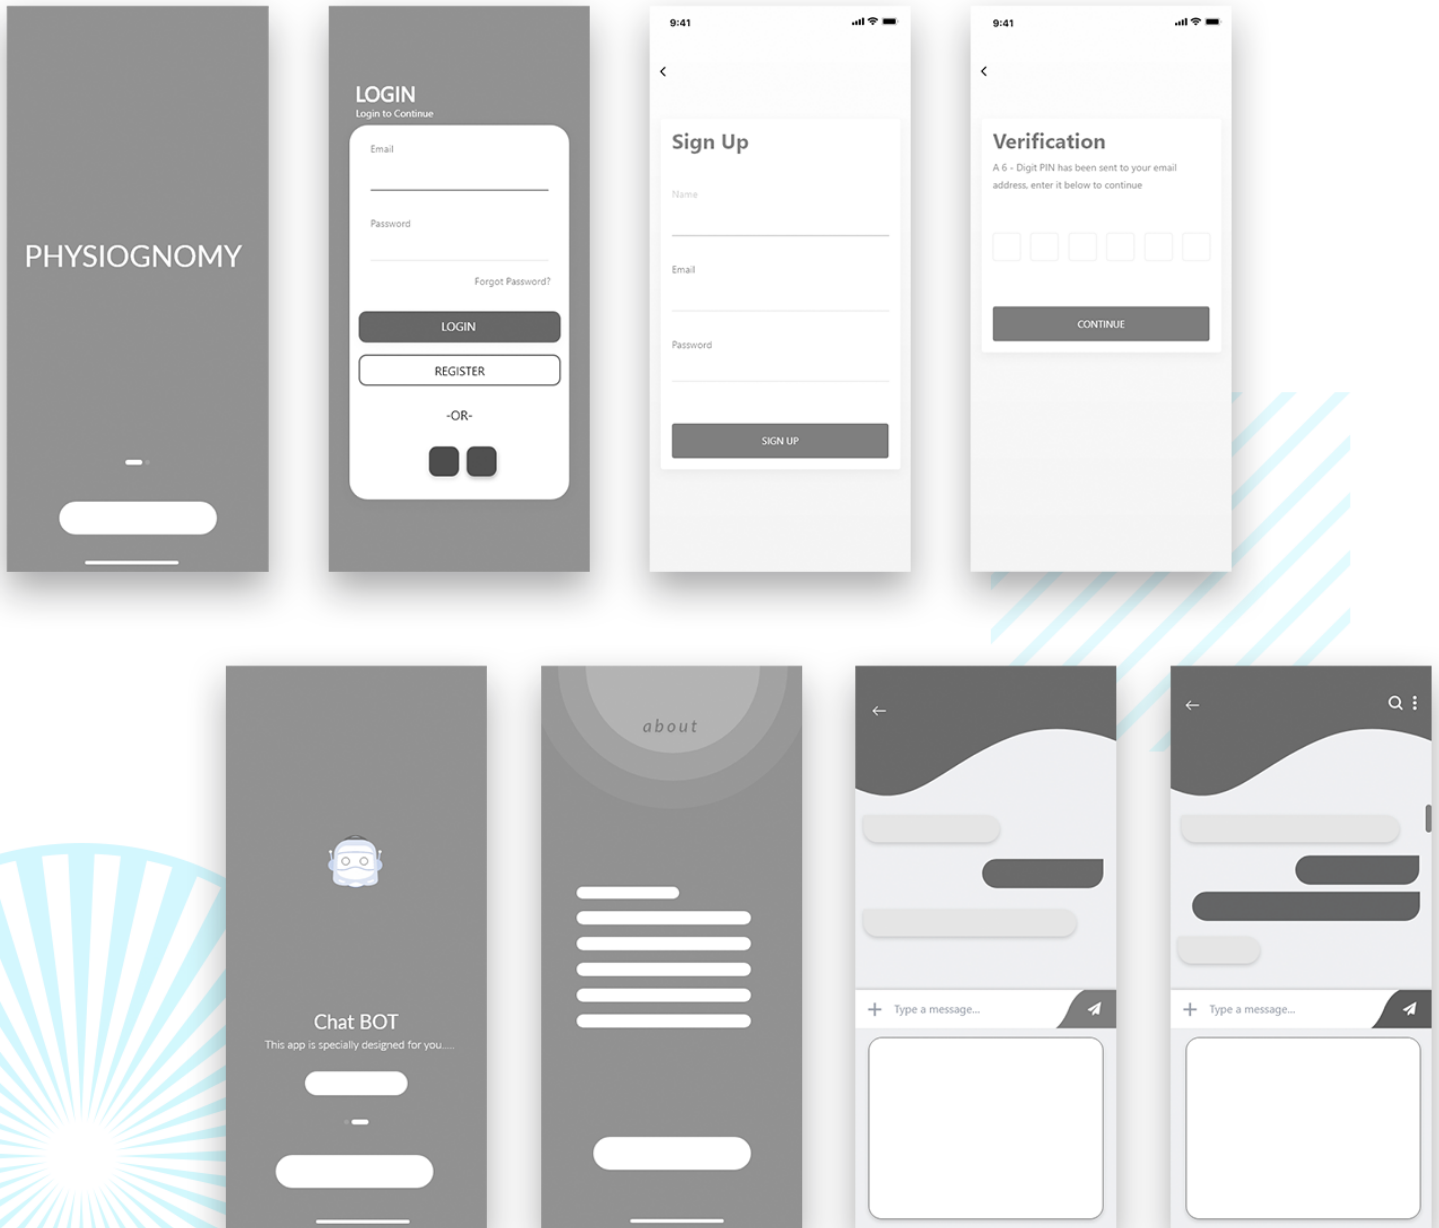

And this is what we will do indirectly, without putting person in a psychological pressure or making him afraid about society judgments through a game which contains multiple levels, each level try to detect some symptoms of the disease by the action that he will take.

Talking about mental health doesn't have to be difficult after all is something we all have.

Wireframe

wireframing is an important communication tool in any app project. it gives us an opportunity to walk through the structure of the application without getting distracted by design elements.
